Projects

- Line Follower Robot with Obstacle Detection
- Voice Controlled Robot
- IoT Water Level Monitoring System using ESP32 and Blynk
- Sunnah Cart E-Commerce Website
- Cross-Border Shipment Status and Customs Declaration Data Integration System
- Air Ticket Reservation System
- Currency Converter

Skills

- Programming (C/C++, Java, Python)
- Database (SQL, DBMS)
- Cybersecurity Basics
- Problem Solving / DSA

Education

- Bachelor of Science in Computer Science and Engineering (B.Sc. in CSE)

International Islamic University
Chittagong

2024-2027

Bachelor of Science in Computer Science and Engineering (CSE) student with a strong interest in Cybersecurity, Artificial Intelligence, and Machine Learning. Experienced in programming, database systems, and hands-on technical projects. Passionate about research, problem-solving, and developing innovative solutions that contribute to secure and intelligent digital systems.

About Me

I am a dedicated and highly motivated Computer Science and Engineering (CSE) student with a strong passion for software development, cybersecurity, and emerging technologies such as Artificial Intelligence and Machine Learning. I am continuously working to strengthen my technical foundation through academic coursework, hands-on laboratory exercises, and independent learning.

My academic journey has helped me develop solid skills in programming, problem-solving, data structures, algorithms, and database management systems. Alongside my studies, I actively engage in practical projects that enhance my understanding of real-world computing systems and improve my ability to design efficient and scalable solutions.

I have a particular interest in cybersecurity, including network defense, digital forensics, and AI-driven security systems. I am especially fascinated by how modern technologies can be used to detect threats, automate security processes, and protect digital infrastructures from evolving cyber risks.

In addition to technical skills, I am focused on improving my analytical thinking, research capability, and teamwork skills. My long-term goal is to pursue advanced research opportunities and a fully funded Master's by Research or PhD abroad in the field of Cybersecurity or AI-based Security Systems, contributing to innovative solutions in global cybersecurity challenges.
